Consent to Receive Network Spinal Care

Welcome!

Network Spinal care involves a series of gentle, non-force applications to specific areas of the neck and spine which assist in the release of chronic nervous system trauma/stress patterns and musculoskeletal tension. Though fully licensed and registered as a Doctor of Chiropractic, my practice of NS care does not attempt to manually manipulate spinal fixations structurally, nor does it attempt to directly treat painful areas of the spine and body. Rather, through the application of these clinically predetermined light contacts to specific spinal areas, one can better attempt to develop new strategies for healing, become more attune to the wants and needs of the body's inner rhythms with a greater capacity to deal with stress... and thus experience more of their potential for an energy rich, vibrant, loving successful life.

NS care is not a form of, or replacement for the diagnosis or treatment of any symptom, disease or malady. Instead, it is a form of wellness care and self-education that empowers your body-mind to constantly reorganize to higher states of function and complexity for you to experience the most optimal, "authentic" version of yourself you may never have known before.

"I, _____, have read the Consent to receive
(Please print)

Network Spinal care and agree to receive the work in all its intents and purposes.
